## PROFESSIONAL SUMMARY

Detail-oriented Laravel & PHP Backend Developer with 3+ years of experience building, maintaining, and deploying robust web applications. Specialize in designing clean RESTful APIs, optimizing complex MySQL databases, and writing maintainable code in Laravel and CodeIgniter. Proven track record in solving database query bottlenecks, integrating third-party APIs (Stripe, Twilio, OpenAI), and implementing offline-first syncing capabilities (IndexedDB). Active remote collaborator dedicated to clean MVC structures and fast load times.

---

## TECHNICAL SKILL MATRIX

**Backend Development:** PHP Core, Laravel, CodeIgniter 3, Livewire, RESTful APIs, MVC Patterns

**Database & Storage:** MySQL, Database Design, Composite Indexing, Query Optimization, SQLite, IndexedDB Caching

**Frontend Core:** HTML5, CSS3, JavaScript (ES6), Tailwind CSS, Bootstrap 5, AJAX, jQuery

**Tools & DevOps:** Git, GitHub, Composer, npm, cPanel, phpMyAdmin, Postman, WAMP, Vite

## PROFESSIONAL EXPERIENCE

---

### Freelance Web Developer | [Fiverr & Upwork](#)

Jan 2024 – Present

- Fix Laravel and PHP bugs, resolve styling issues, and troubleshoot server deployment errors for international clients.
- Design custom MVC web tools and database management modules utilizing Laravel and MySQL.
- Integrate secure third-party payment gateways (Stripe Checkout) and automated email or SMS APIs.
- Optimize database structures and write efficient AJAX scripts to reduce page load latency.

### Backend Developer | [HaddockSoft](#)

May 2022 – Dec 2025

- Maintained and scaled complex real-estate listings platforms in Laravel and CodeIgniter 3 for the UAE market.
- Engineered automated, cron-scheduled XML parsing scripts that synchronized a massive volume of active property listings daily from multiple external data feeds.
- Optimized slow database queries, improving query response times and application load speeds through composite indexing and schema denormalization.
- Implemented transactional database locks (`DB::transaction`) to safeguard payout processing systems against race conditions.

### Backend Developer Intern | [POS Management Project Team](#)

Oct 2023 – Mar 2024 (6 Months)

- Developed a local-first cashier transactional database inside the browser using IndexedDB.
- Programmed barcode scanner parsing modules and thermal receipt print layout CSS styles.
- Coded background sync workers to automatically upload queued transaction logs to central MySQL databases once internet connectivity resumed.

## SELECTED PROJECTS

---

### ApnaSahiwal City Portal

Laravel, MySQL, GIS, Google Maps API

A digital directory and community hub for Sahiwal, featuring geospatial searches.

- Coded geospatial SQL queries using MySQL GIS functions (`ST\_Distance\_Sphere`) to calculate distance offsets, optimizing distance query response latency.

### POS Billing System

Core PHP, JavaScript, IndexedDB, AJAX, Bootstrap 5, MySQL

Point of Sale billing system allowing local checkout logs to sync when connection resumes.

- Engineered a local-first cashier transactional database in IndexedDB, running offline checkout queues and syncing logs to central servers upon reconnection.

### LuxLiving UAE Real Estate

CodeIgniter 3, MySQL, XML Sync Feeds, Google Maps API

Luxury real estate portal matching UAE listings feed imports.

- Wrote a chunk-based XML stream parser that handles large XML feeds without timeouts, optimizing heap memory usage.

### AllToolPro SEO Platform

Core PHP, JavaScript, AJAX, Bootstrap 5, MySQL

A collection of 100+ free online meta, speed, and parsing tools.

- Programmed custom client rate-limiting scripts tracking user IPs to protect resources from web scraper abuse.

## EDUCATION

---

**Bachelor of Science in Computer Science (BS-CS)** | Govt.  
Postgraduate College Sahiwal

2022 – 2026 | Expected  
Graduation: 2026
